

Reading Books

At Wood Ley we use the Oxford Reading Tree scheme. The first stage only has pictures and helps the children to get to know the characters; as well as to 'read' the story using the picture clues—a valuable strategy when first learning to read. The children then progress through the subsequent stages at a pace suited to their needs and abilities.

Tricky words

Tricky words are words that cannot be 'sounded-out' but need to be learned by heart. They don't fit into the usual spelling patterns. Examples of these words are attached. In order to read simple sentences, it is necessary for children to know some words that have unusual or untaught spellings. It should be noted that, when teaching these words, it is important to always start with sounds already known in the word, then focus on the 'tricky' part.

High frequency Words

High frequency (common) are words that recur frequently in much of the written material young children read and that they need when they write. Each child will have a word wallet and as the children get to know the words more words will be added. If you can spend five minutes as frequently as you can practising these words in a fun way your child will benefit greatly. 'Little and often' is the key!

Foundation Stage Phonics

Letters and Sounds is a fun and interactive way to support children in learning how to read and write. Initially, for the children to learn their sounds we use a programme called *Jolly Phonics*. Jolly Phonics represents each sound with an action helping children to remember both more easily. We will be sending home a keyring to help your child to learn these sounds.

The alphabet contains only 26 letters. Spoken English uses about 42 sounds (phonemes). These phonemes are represented by letters (graphemes). In other words, a sound can be represented by a letter (e.g. 's' or 'h') or a group of letters (e.g. 'th' or 'ear')

Once children begin learning sounds, they are used quickly to read and spell words. Children can then see the purpose of learning sounds. For this reason, the first six letters that are taught are 's', 'a', 't', 'p', 'i', 'n'. These can immediately be used to make a number of words such as 'sat', 'pin', 'pat', 'tap', 'nap'

As a parent, your involvement in supporting your child's learning will be a vital factor in determining their success in learning to read.

Hannah Widdison

Blending—for reading

To learn to read well children must be able to smoothly blend sounds together. Blending is saying the sounds in a word slowly then quickly to hear the word. Blending sounds fluidly helps to improve fluency when reading. Blending is more difficult to do with longer words so learning how to blend accurately from an early age is imperative.

Showing your child how to blend is important. Model how to 'push' sounds smoothly together without stopping at each individual sound.

It is also recommended to talk to your child about what blending is so they understand what they are trying to achieve.

Segmenting—for spelling

Segmenting is a skill used in spelling. In order to spell the word cat, it is necessary to segment the word into its constituent sounds: c-a-t.

Children often understand segmenting as 'chopping' a word. Before writing a word young children need time to think about it, say the word several times, 'chop' the word and then write it. Once children have written the same word several times they won't need to use these four steps as frequently.

Children will enjoy spelling if it feels like fun and if they feel good about themselves as spellers. We need, therefore, to be playful and positive in our approach - noticing and praising what children **can** do as well as helping them to correct their mistakes.

The phases

Letters and Sounds is split into 6 phases. Below is an overview what is included in each phase.

Phase One (Nursery / Pre-school)

The aim of this phase is to foster children's speaking and listening skills as preparation for learning to read with phonics. **Parents can play a vital role in helping their children develop these skills, by encouraging their children to listen carefully and talk extensively about what they hear, see and do.**

Phase Two - Four (Reception)

Phase Two is when systematic, high quality phonic work begins. During Phase Two to Four, children learn:

- * How to represent each of the 42 sounds by a letter or sequence of letters.
- * How to blend sounds together for reading and how to segment (split) words for spelling.
- * Letter names
- * How to read and spell some high frequency 'tricky' words containing sounds not yet learnt (e.g. they, my, her, you).

The Letters and Sounds Programme progresses from the simple to the more complex aspects of phonics at a pace that is suitable for the children who are learning.

Phase Five (Year 1)

Children learn new ways of representing the sounds and practise blending for reading and segmenting for spelling.

Phase Six (Year 2)

During this phase, children become fluent readers and increasingly accurate spellers.
